

ON SPC TRUST CREATION INITIAL PROPERTY DESCRIPTION

You need to pick a piece of property that the LIVING MAN with Upper-And: Lower-Case: Letters owns.

You can NOT pick a piece of property that the ALL CAPS NAME OWNS OR BOUGHT. Therefore, anything you bought with your ALL CAPS LEGAL NAME through a credit card or debit card, etc is NOT ACCEPTABLE.

NEXT, you can NOT pick a phone or a computer since if you read the contracts, the phones say you never really own your own phone.

You can NOT pick a car because again you do not own your car, the STATE OWNS IT since it was registered.

You can NOT pick land unless you have full and clear alloidial title and do not pay property taxes for that land, and has no liens on it.

Since your exchanger is your common law man or woman then you need to pick property that the common law man is granting into the trust. If there are any bank records or receipts.

I recommend picking property that was passed down or given to you, never registered at all. Such as antiques, jewelry handed down (not purchased on your bank card) baseball cards, collectibles, silver coin(s), gold bar or coins, hand-made items like ceramics, stones or healing crystals purchased with cash or exchanged/bartered. It is recommended that the FAIR MARKET VALUE (what you could reasonably sell it for if you were to auction it) should be between \$100 and \$2000, give or take. Definitely make sure the fair value is over \$21 and try to get it over \$100 if possible. If you have more than one item then you can combine the items and describe it as one item. Take a photo of the item and keep the records in your trust attached to the SCHEDULE A page (when you receive it). Date the page/photo with a witness if you want real solid proof and backup witnesses, however your exchange documents and bill of sale are also sufficient.
